February 1<sup>st</sup>, 2010

### **Magest Building Systems Limited Awarded Contract by RHC Design-Build for the design/engineering and fabrication of a four storey affordable housing project in Cambridge, Ontario**

**Stratford, Ontario** – Magest Building Systems Limited of Stratford, Ontario announced today that it has been awarded a sub-contract by RHC Design-Build to design, engineer and fabricate a four storey affordable housing/apartment building in Cambridge, Ontario.

The facility located on Margaret Street in Cambridge consists of approximately 46,000 sq. ft. including 53 one bedroom units and 8 two bedroom units.

The Architect for the project is BJC Architects of Guelph and the Engineer is Finelli Engineering Inc., from Burlington.

The proposed completion date is scheduled for the second quarter 2011.

Magest Building Systems Limited (MBSL) a wholly owned subsidiary of The Magest Group Limited, is a manufacturer of load bearing cold formed steel framing systems.

MBSL specialize in roof truss systems, wall panel systems, flooring systems and related cold formed steel accessories for assisted living facilities, the hospitality industry, nursing homes, schools, military facilities, apartment buildings and multi-residential complexes.

Our 45,000 sq. ft. offices, assembly and manufacturing facilities are located in Stratford, Ontario, Canada.
